1. Goals, objectives and planned learning outcomes in the discipline

The main purpose of the discipline is to prepare students for educational activities in educational program disciplines. This discipline allows the student to make a choice regarding further specialization in relation to his specialty, taking into account his personal, individual abilities and needs. The main blocks of economic sciences are considered in order to understand the student's future development within the framework of this specialty. The discipline will allow students to begin to independently determine their own further development, both within the framework of the individual and within the framework of separately formed groups united by interests and needs.

The main tasks of mastering the discipline "Introduction to Professional Activity" include:

- development of the student's personal qualities in terms of adaptation to the social environment;
- education and formation of highly moral and ethical principles that will form a comprehensively developed specialist ready to interact with the outside world;
- mastering the base of methodological knowledge in preparation for various types of classes, which will help the student in a more complete and comprehensive study of the proposed disciplines.

Training in the discipline "Introduction to Professional Activity" is aimed at developing the following competencies in students:

Code and name of competencies	Competence achievement indicators
OPK-1. Able to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory	IOPK-1.1. Knows ways to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory. IOPK-1.2. Able to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory. IOPK-1.3. Has the skills to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory.

2. The place of discipline in the structure of the educational program

The discipline refers to the mandatory part of block B1 "Disciplines (modules)".

The discipline "Introduction to Project Activity" is interconnected logically and content-methodically with the following disciplines and practices of the OP:

- Project activity
- Basic Management
- Art of Presentation Skills in Professional Sphere
- Economic theory

3. Structure and content of the discipline

The total labor intensity of the discipline is 3 credit(s) unit(s) (108 hours).

3.1 Types of educational work and labor intensity

(according to the forms of education)

3.1.1. Half-time education

No. p / p	Type of study work	Quantity hours	Semesters	
			3

3.3 The content of the discipline

Topic 1. Basic requirements for students studying the discipline "Management"

The importance of the profession of a manager. Main directions of activity. The importance of the work performed within the framework of the activities of an individual enterprise and the economy as a whole. Application of management skills in everyday life and in various fields of activity. Career prospects for managers: requirements and limitations.

Topic 2. Fundamentals of working with theoretical material

Norms of behavior at a lecture for optimal interaction between the teacher and students. Methods of motivation for learning and completing tasks. Rules for communication in lectures. Rules for keeping notes. Fundamentals of practical exercises.

Fundamentals of rational reading. Analysis of the material read and interpretation for optimal memorization. The choice of educational literature. Fundamentals of preparation for the final certification. Rules for the design of term papers, abstracts, graduation qualification papers, practice reports.

Topic 3. Features of job search in accordance with the acquired knowledge and skills

The choice of the most interesting job, the industry of application of their knowledge and skills, the location of the desired occupation. job search phases. Job search methods, the basics of using additional information. The basics of writing a resume.

Topic 4. Preparing for an interview

Requirements for the selection of clothes for the interview. Rules of conduct in an interview. Psychological preparation for interviewing. Formation of a package of documents for employment. Paperwork. Standards of communication with a potential employer by phone. Business correspondence via the Internet.

Topic 5. Fundamentals of organizational behavior

The concept and directions of development of organizational behavior. The history of the formation of organizational behavior. The concept and types of organization. individual behavior. The effectiveness of the organization.

Topic 6. Rules for interaction with team members

Types of relationships in the team. organizational conflicts. Socio-psychological groups. Leadership in the organization.

Topic 7. Choosing the direction of development

Choosing the direction of the company's development. Formation of a strategic vision. Goal setting. Strategy Development. Consolidation of efforts to develop a strategy. Factors influencing the company's strategy. Criteria for a successful strategy.

Topic 8. Features of the work of a manager and marketer. Basic Marketing Approaches

Features of the work of a manager. Features of the work of a marketer. Basic marketing approaches in management.

Topic 9. Practical skills of a manager and marketer

Managerial Effectiveness Skills. Practical skills of qualified marketers.

Topic 10. Management and its role in the development of society

Concept and essence of management. Content and functions of management. The role of management in the development of society.

Topic 11. Professional and personal qualities of a manager

Personal qualities of a modern manager. manager's professional qualities. Professional ethics of the manager.

Topic 12. Student self-management

The concept and goals of self-management. Time planning: time management. Working time planning. Time absorbers (chronophages). Chronophages in the modern world. Organization of students' studies during the semester. Rules for preparing for exams.

Topic 13. Comparative analysis of management models

Characteristics of national management models (American, Japanese, European). Comparison of American and Japanese models of management.

Topic 14. Methods and mechanisms of modern Russian management

General information about modern management. The structure of the management mechanism. Intraorganizational management. Principles, functions and methods of intraorganizational management.

Topic 15. Modern forms of business organization

The concept, main features and areas of entrepreneurial activity. Infrastructure of modern business. Typology of organizational forms of business. Basic forms of business organization.

Topic 16. Organization and development of your own business

The procedure for creating a new enterprise. Feasibility study and business plan. Risk in the activity of an entrepreneur.

State registration of the enterprise. The composition of the founders, and the development of constituent documents. Project justification indicators. 4. Educational, methodological and information support

4.1 Main literature

1. Odintsov, A. A. Fundamentals of management: a textbook for universities / A. A. Odintsov. — 2nd ed., corrected. and additional - Moscow: Yurayt Publishing House, 2022. - 210 p. - (Higher education). - ISBN 978-5-534-04814-8. — Text: electronic // Educational platform Urayt [website]. — URL: <https://urait.ru/bcode/491931>.

4.2 Additional literature

1. Frolov, Yu. V. Theory of organization and organizational behavior. Methodology of organization: textbook for universities / Yu. V. Frolov. — 2nd ed., corrected. and additional - Moscow: Yurayt Publishing House, 2022. - 116 p. - (Higher education). - ISBN 978-5-534-09522-7. — Text: electronic // Educational platform Urayt [website]. - url:<https://urait.ru/bcode/491862>

2. Mardas, A. N. Fundamentals of management. Practical course: textbook for secondary vocational education / A. N. Mardas, O. A. Gulyaeva. — 2nd ed., corrected. and additional - Moscow: Yurayt Publishing House, 2022. - 175 p. - (Professional education). - ISBN 978-5-534-08328-6. — Text: electronic // Educational platform Urayt [website]. — URL: <https://urait.ru/bcode/492505>.

4.3 Electronic educational resources

Electronic educational resource for the discipline is being developed.

5. Logistics

Audience for lectures and seminars of the general fund. Training tables with benches, classroom board, portable multimedia complex (projector, projection screen, laptop). Teacher's workplace: table, chair.

6. Guidelines

6.1 Methodological recommendations for the teacher on the organization of training

A presentation (from the English word - presentation) is a set of color slide pictures on a specific topic, which is stored in a special format file with the PP extension. The term "presentation" (sometimes called "slide film") is associated primarily with the information and advertising functions of pictures that are designed for a certain category of viewers (users).

In order for the presentation to be well perceived by the audience and not cause negative emotions (subconscious or completely conscious), it is necessary to follow the rules for its design.

The presentation involves a combination of information of various types: text, graphics, musical and sound effects, animation and video clips. Therefore, it is necessary to take into account the specifics of combining fragments of information of various types. In addition, the design and demonstration of each of the listed types of information is also subject to certain rules. So, for example, for textual information, the choice of font is important, for graphic information - brightness and color saturation, for their best joint perception, optimal relative position on the slide is necessary.

In addition to the correct arrangement of text blocks, one must not forget about their content - the text. In no case should it contain spelling errors. You should also take into account the general rules for formatting the text.

After creating a presentation and its design, you need to rehearse its presentation and your performance, check how the presentation will look like as a whole (on a computer screen or projection screen), how quickly and adequately it is perceived from different audience locations, under different lighting conditions, noise accompaniment, in an environment as close as possible to the real conditions of the performance.

6.2 Guidelines for students on mastering the discipline

Lecture - a systematic, consistent, monologue presentation by the teacher of educational material, as a rule, of a theoretical nature. When preparing a lecture, the teacher is guided by the working program of the discipline. In the course of lectures, it is recommended to take notes, which will later allow you to recall the studied educational material, supplement the content during independent work with literature, and prepare for the exam.

You should also pay attention to categories, formulations that reveal the content of certain phenomena and processes, scientific conclusions and practical recommendations, positive experience in oratory. It is advisable to leave fields in the working notes on which to make notes from the recommended literature, supplementing the material of the lecture heard, as well as emphasizing the particular importance of certain theoretical positions.

Lecture conclusions summarize the teacher's reflections on educational issues. The teacher provides a list of used and recommended sources for studying a particular topic. At the end of the lecture, students have the opportunity to ask questions to the teacher on the topic of the lecture. When lecturing on the discipline, electronic multimedia presentations can be used.

Guidelines for students when working at the seminar

Seminars are implemented in accordance with the working curriculum with consistent study of the topics of the discipline. In preparation for the seminars, the student is recommended to study the basic literature, get acquainted with additional literature, new publications in periodicals: magazines, newspapers, etc. In this case, the recommendations of the teacher and the requirements of the curriculum should be taken into account. It is also recommended to refine your lecture notes by making appropriate entries in it from the literature recommended by the teacher and provided by

the curriculum. Abstracts should be prepared for presentations on all educational issues submitted to the seminar.

Since the student's activity in seminars is the subject of monitoring his progress in mastering the course, preparation for seminars requires a responsible attitude. In interactive classes, students should be active.

Guidelines for students on the organization of independent work

Independent work of students is aimed at independent study of a separate topic of the academic discipline. Independent work is mandatory for each student, its volume is determined by the curriculum. During independent work, the student interacts with the recommended materials with the participation of the teacher in the form of consultations. To perform independent work, methodological support is provided. The electronic library system (electronic library) of the university provides the possibility of individual access for each student from any point where there is access to the Internet.

7. Evaluation fund

7.1 Methods for monitoring and evaluating learning outcomes

Competence level indicator

Introduction to Project Activity						
FGOS VO 38.03.02 "MANAGEMENT"						
In the process of mastering this discipline, the student forms and demonstrates the following competencies:						
COMPETENCES	INDEX	FORMULATION	List of components	Competence formation technology	Assessment Tool Form**	Degrees of levels of development of competencies
OPK-1		The ability to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory	IOPK-1.1. Knows ways to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory. IOPK-1.2. Able to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory. IOPK-1.3. Has the skills to solve professional problems based on knowledge (at an intermediate level) of economic, organizational and management theory.	lecture, independent work, seminars	DS, E	A basic level of - is able to analyze, apply skills and functions of competence in training and prepared situations Enhanced level -able to analyze, apply the skills and functions of competence in practice and in non-standard situations

7.2 Scale and criteria for evaluating learning outcomes

Scales for assessing the results of intermediate certification and their description:

Form of intermediate certification: exam.

Intermediate certification of students in the form of an exam is carried out based on the results of all types of educational work provided for by the curriculum for a given discipline (module), while taking into account the results of current monitoring of progress during the semester. The assessment of the degree of achievement by students of the planned learning outcomes in the discipline (module) is carried out by the teacher conducting classes in the discipline (module) by the method of expert assessment. Based on the results of the intermediate attestation for the discipline (module), the mark "excellent", "good", "satisfactory" or "unsatisfactory" is given.

Only students who have completed all types of educational work provided for by the work program in the discipline "Introduction to the Profession" are allowed to the intermediate certification (passed the intermediate control)

Evaluation scale	Description
Great	All types of educational work provided for by the curriculum were completed. The student demonstrates the correspondence of knowledge, skills and abilities given in the tables of indicators, operates with the acquired knowledge, skills, skills, applies them in situations of increased complexity. In this case, minor errors, inaccuracies, difficulties in analytical operations, transferring knowledge and skills to new, non-standard situations can be made.
Fine	All types of educational work provided for by the curriculum were completed. The student demonstrates incomplete, correct correspondence of knowledge, skills, and abilities given in the tables of indicators, or if 2-3 minor errors were made at the same time.
Satisfactorily	All types of educational work provided for by the curriculum were completed. The student demonstrates the conformity of knowledge, which covers the main, most important part of the material, but at the same time one significant error or inaccuracy was made.
Unsatisfactory	One or more types of educational work provided for by the curriculum have not been completed. The student demonstrates incomplete correspondence of knowledge, skills and abilities given in the tables of indicators, significant errors are made, the lack of knowledge, skills and abilities is manifested in a number of indicators, the student experiences significant difficulties in operating knowledge and skills when transferring them to new situations.

7.3 Evaluation tools

List of assessment tools by discipline "Introduction to Project Activity"

OS number	Name of the evaluation tool	Brief description of the evaluation tool	Presentation of the evaluation tool in the FOS
1	Report, message (DS)	The product of the student's independent work, which is a public performance on the presentation of the results of solving a specific educational, practical, educational, research or scientific topic	Topics of reports, messages
2	Exam (E)	The final form of knowledge assessment. In higher education institutions are held during the session.	Questions for the exam
